Inheritance of Autosomal Mutations

Dominant Mutation:

Recessive Mutation:

INHERITANCE OF AUTOSOMAL MUTATIONS

Recessive Mutations Cont:

100% Affected Offspring

Note: The figures quoted are, in all probability, estimates. Reality can be different. In principle if you flip a coin it has a 50% chance of coming down 'heads' and 50% chance of coming down 'tails'. So the proportion of offspring in individual litters can differ from the expected outcomes given above.
